Rusty Nezat has been supplying training and consultation services to municipalities and contractors involved in sewer cleaning processes since 1999. After 20+ years of sewer cleaning field experience, he has created accredited classroom and field training courses. In addition to training, he provides custom evaluation services and with his unique approach, sewer groups typically increase production, lower equipment downtime, and most importantly, increase safety on the job.

 The Debris Cap™ is a simple, cost effective solution to keeping water valves, pipes and risers free of dirt and debris allowing un-restricted access to valve shut-off for utility workers in a safe and timely manner. Our products were designed to save municipalities, utility companies and emergency response crews thousands of dollars as well as crew hours to ensure the reduction of liability, insurance and maintenance costs.

We see the bigger picture.

We see more in water than the science. For 90 years, we've been inspired to safeguard the quality of life for our families and communities, while protecting our fragile ecosystems.
